#### GENERAL DESCRIPTION

**FSD101HT10BT1-C01** is a TFT dot matrix LCD module.It is composed of a PCBA,color-LCD panel, driver IC, FPC and a backlight unit. The module display area contains 1024x600 pixels. This product accords with RoHS environmental criterion.

#### LCM PARAMETER

| ltem                   | Contents                     | Unit       | Notes      |
|------------------------|------------------------------|------------|------------|
| LCD Type               | TFT TRANSMISSIVE             | /          | /          |
| Viewing direction      | 12:00                        | O' Clock   | IPS        |
| PCBA Outside           | 250.00(W)*115.00(H)*13.50(T) | mm         | /          |
| LCM Outside Dimensions | 235.00(W)*143.00(H)*3.50(T)  | mm         | /          |
| Active Area (WxH)      | 222.72(W)*125.28(H)          | mm         | /          |
| Number of Dots         | 1024x600                     | 1024x600 / |            |
| Driver IC              | LT7688                       | /          | Vcc=3.3V   |
| Colors                 | 16.2M /                      |            | /          |
| Touch Type             | CTP (I2C)                    | / Vctp=    |            |
| Backlight Type         | 3*9=27LEDS / White /         |            | Vbl=9.2V   |
| Backlight Luminance    | 300 cd/m                     |            | /          |
| Interface Type         | TTL UART (TXD/RXD) /         |            | 4PIN(2.54) |
| Input Voltage          | 5.0V (VDD) V                 |            | 2A         |

#### SERAL CHARACTERISTIC

| ltem                  | MIN  | Typical | MAX    | Unit  | Notes     |
|-----------------------|------|---------|--------|-------|-----------|
| Operating Voltage     | 4.75 | 5.0     | 5.5    | V     | VDD       |
| Operating Current     |      | 550     |        | mA    | 5V Power  |
| Operating Temperature | -20  | 25      | 70     | °C    | /         |
| Storage Temperature   | -30  | 25      | 80     | °C    | /         |
| Serial Baud rate      | 2400 | 9600    | 115200 | bps   | Standards |
| Serial Output Leve    | 3.0  | 3.2     | 3.3    | V     | Н         |
| Serial Input Leve     | 3.0  | 3.3     | 5.0    | V     | Н         |
| Extend Flash          | 64M  | 128M    | 2G     | bits  | Nor/Nand  |
| Display Memory        |      | 128M    |        | Bytes | MCU       |
| Flash Memory          |      | 64K     |        | Bytes | MCU       |
| SRAM Memory           |      | 8K      |        | Bytes | MCU       |
| MCU Frequency         |      | 72M     |        | Hz    | MCU       |

#### ■ ABSOLUTE MAXIMUM RATINGS(TFT, 非PCBA)

| Parameter                 | Symbol | Min  | Мах                 | Unit |
|---------------------------|--------|------|---------------------|------|
| Power for Circuit Driving | VCC    | -0.3 | 4.6                 | v    |
| Power for Circuit Logic   | IOVCC  | -0.3 | 4.6                 | V    |
| Input voltage             | Vin    | -0.3 | VCC + 0.3           | v    |
| Operating temperature     | Тор    | -20  | 70                  | ĉ    |
| Storage temperature       | Tst    | -30  | 80                  | ĉ    |
| Humidity                  | RH     | /    | <b>90%(Max60</b> ℃) | RH   |

### ELECTRICAL SPECIFICATIONS(TFT,非PCBA)

| Parameter                  | Symbol   | Min      | Тур | Max      | Unit |

#### **INSPECTION CRITERION**

#### **Sampling Method**

Unless otherwise agreed upon in writing, the sampling inspection shall be applied to the Customer's incoming inspection.

- 1 Lot size: Quantity per shipment lot
- 2 Sampling type: Normal inspection , single sampling
- 3 Inspection level: II
- 4 Sampling table: MIL-STD-105D
- 5 Acceptable Quality Level(AQL): Major=0.65 Minor=1.5

#### **Inspection Method**

- 1) Ambient Condition:
  - a. Temperature: Room temperature  $25\pm5\,^{\circ}{
    m C}$
  - b. Illumination: Single fluorescent lamp non-directive(300 to 700 Lux)
- 2) Viewing distance

The distance between the LCD and the inspector's eyes shall be at least 30-50cm.

3) Viewing Angle

The inspection shall be conducted within normal viewing angle range.

#### **Major Defect**

| No | Items                        | Inspection Standard   | Classification of defects |  |
|----|------------------------------|---|---------------------------|--|

| 5   | High Temperature and HighHumidity Operation | 50℃, 90% RH; 120 hrs                 |
| 6   | Thermal shock(Storage)                      | -20℃(0.5Hr)→70℃(0.5Hr)<br>100 Cycles |

NOTE:

1. All judgement of display are performed after temperature of panel return to room temperature.

2. Display function should be no change under normal operating condition.

3. Under no condensation of dew.

4. WE only guarantee the above 6 test items, and without guarantee the others.

#### **PRECAUTIONS**

#### **Handing Precautions**

(1) The display panel is made of glass and polarizer. As glass is fragile, it tends to become or chipped during handling especially on the edges. Please avoid dropping or jarring. Do not subject it to a mechanical shock by dropping it or impact.

(2) If the display panel is damaged and the liquid crystal substance leaks out, be sure not to get any in your mouth. If the substance contacts your skin or clothes, wash it off using soap and water.

(3) Do not apply excessive force to the display surface or the adjoining areas since this may cause the color tone to vary. Do not touch the display with bare hands. This will stain the display area and degraded insulation between terminals (some cosmetics are determined to the polarizer).

(4) The polarizer covering the display surface of the LCD module is soft and easily scratched. Handle this polarizer carefully. Do not touch, push or rub the exposed polarizers with anything harder than an HB pencil lead (glass, tweezers, etc.). Do not put or attach anything on the display area to avoid leaving marks on. Condensation on the surface and contact with terminals due to cold will damage, stain or dirty the polarizer. After products are tested at low temperature they must be warmed up in a container before coming is contacting with room temperature air.

(5) If the display surface becomes contaminated, breathe on the surface and gently wipe it with a soft dry cloth. If it is heavily contaminated, moisten cloth with one of the following solvents

- Isopropyl alcohol

- Ethyl alcohol

Do not scrub hard to avoid damaging the display surface.

(6) Solvents other than those above-mentioned may damage the polarizer. Especially, do not use the following.

- Water
- Ketone
- Aromatic solvents

Wipe off saliva or water drops immediately, contact with water over a long period of time may cause deformation or color fading. Avoid contacting oil and fats.

(7) Exercise care to minimize corrosion of the electrode. Corrosion of the electrodes is accelerated by water droplets, moisture condensation or a current flow in a high-humidity environment.

(8) Install the LCD Module by using the mounting holes. When mounting the LCD module make sure it is free of twisting, warping and distortion. In particular, do not forcibly pull or bend the I/O cable or the backlight cable.

(9) Do not attempt to disassemble or process the LCD module.

(10) NC terminal should be open. Do not connect anything.

(11) If the logic circuit power is off, do not apply the input signals.

(12) Since LCM has been assembled and adjusted with a high degree of precision, avoid applying excessive shocks to the module or making any alterations or modifications to it.

- Do not alter, modify or change the shape of the tab on the metal frame.

- Do not make extra holes on the printed circuit board, modify its shape or change the positions of components to be attached.

- Do not damage or modify the pattern writing on the printed circuit board.

- Absolutely do not modify the zebra rubber strip (conductive rubber) or heat seal connector.

- Except for soldering the interface, do not make any alterations or modifications with a soldering iron.

- Do not drop, bend or twist LCM.

#### **Storage Precautions**

When storing the LCD modules, the following precaution is necessary.

(1) Store them in a sealed polyethylene bag. If properly sealed, there is no need for the dessicant.

(2) Store them in a dark place. Do not expose to sunlight or fluorescent light, keep the temperature between 0° C and 35° C.

(3) The polarizer surface should not come in contact with any other objects. (We advise you to store them in the container in which they were shipped).

#### Others

Liquid crystals solidify under low temperature (below the storage temperature range) leading to defective orientation or the generation of air bubbles (black or white). Air bubbles may also be generated if the module is subject to a low temperature.

If the LCD modules have been operating for a long time showing the same display patterns, the display patterns may remain on the screen as ghost images and a slight contrast irregularity may also appear. A normal operating status can be regained by suspending use for some time. It should be noted that this phenomenon does not adversely affect performance reliability. To minimize the performance degradation of the LCD modules resulting from destruction caused by static electricity etc., exercise care to avoid holding the following sections when handling the modules.

- Exposed area of the printed circuit board.

-Terminal electrode sections.
